

26 February 1976

NOTE FOR: Deputy General Counsel

SUBJECT: Implementation of Executive Order 11905

25X1

25X1

I, working with  have compiled the attached sheets as a working tool in an attempt to account for the activities that are required for us to implement Executive Order 11905. As the sheets are not completely self-explanatory, a few words of instruction seem in order.

The sheets are constructed such that each distinct part of the Order can be accounted for as a single line item. Thus, in total there are 219 such items in the Order. Those items are numbered in the first left-hand column. Across the sheets left to right, I have then indicated the pages of the Order on which the item appears, then the particular section, part, subpart, subsubpart or subsubsubpart that comprises the item. For example, item #115 is found on page 19 of the Order and is section 4, part (e), subpart (2), subsubpart (i) and subsubsubpart (B). The next three columns, listed A, B and C, indicate, in our evaluation, what CIA action, if any, is required. Column A represents whether the item should be repeated verbatim in CIA regulations, column B represents whether the item requires a CIA implementing regulatory issuance, i.e., regulation, notice, DCI memorandum, etc., and column C represents that a CIA implementing regulatory issuance may be required--we could not make a definitive decision. I have colored the first of the three blocks in the column for the particular line item if we think one of these three actions seems required. Thus, a lack of any color in that block for the particular item would indicate we think no action is required. When the particular action is completed, the next block in the column for the item can be colored. Thus, a quick visual check can identify those actions remaining to be completed.

In the last five columns, listed F, G, H, I and J, we have made an evaluation as to whether the item seems to require action by IC, NSC, Oversight Board, CFI or Operations Advisory Group, respectively. We have used the same block coloring system for these columns as described above for the CIA action columns.
